

Model	Bluetooth version	Standby*	Talk time*	Weight	Noise Cancelation	Warranty	Other features
<b>Nokia BH104</b>	2.1 w/EDR	8 days	10 hrs.	13g	n/a	1 year	-Adjustable ear hook and ergonomic design for comfort
<b>Nokia BH216</b>	2.1 w/EDR	6 days	6 hrs.	9.7g	Digital sound processing with echo cancelation	1 year	-3 optional ear buds -LED battery indicators
<b>Blackberry HS-500</b>	2.0 w/EDR	5 days	5.5 hrs.	15g	-Noise cancelation	1 year	-Automatic volume control -Micro USB CLA, 4 ear gels, 2 ear hooks incl. -Audio-file streaming (listen to music through the headset)
<b>Motorola H790</b>	2.0	7 days	5 hrs.	9.5g	-Crystal Talk -Echo cancelation -Dual microphone reduction	1 year	-Micro USB charging -Auto Volume Adjust -Comes with 5 ear cushions -Voice prompts for pairing, Mute activation and which phone is ringing. -Pairs up to 2 devices simultaneously.
<b>BlueAnt Z9i</b>	2.0	8 days	5.5 hrs.	11g	-Voice isolation Max (noise, wind & echo reduction) -Digital Sound Processing -Dual microphone reduction	<b>2 years</b>	-Firmware upgrades via USB cable -Free Tech support line -2 ear hook options, 2 ear bud options
<b>Motorola H17</b>	2.1 w/EDR	7 days	5 hrs.	14g	-Crystal Talk -Echo cancelation -Dual microphone reduction	1 year	-Micro USB charging -Auto Volume Adjust -Easy Pair <b>-Flip to connect and disconnect</b>
<b>BlueAnt V1</b>	2.1	8 days	5 hrs.	11g	-Voice isolation Max (noise, wind & echo reduction) -Digital Sound Processing -Dual microphone reduction	<b>2 years</b>	-Voice control - <b>GOOG 411</b> <b>-Audible call ID notification</b> <b>-Comes with a wall, car and USB chargers</b> -Firmware upgrades via USB cable -Free Tech support line -2 ear hook options, 3 ear bud options
<b>Jawbone Prime</b>	2.1	8 days	4.5 hrs.	10g	-Noise Assassin 2.0 -Sensor Signal Fusion: Wind reduction -Voice activity sensor: detects speech frequencies -Dual microphone reduction -Advanced DSP algorithms	1 year	-Auto Volume Adjust -Pairs 2 devices -1 ear loop, 3 traditional fit ear buds & 3 new fit earbuds incl.

Model	Blue version	Standby*	Talk time*	Noise Cancelation	Warranty	Other features
<b>BlueAnt S1</b> \$109 Retail	2.0	33 days	15 hrs.	-Clear voice capture Digital Sound Processing	<b>2 years</b>	-Voice answer -Multipoint technology: allows pairing of 2 phones at the same time, answering whichever one rings. -A2DP music streaming allows you to play music through the bluetooths high performance speaker.
<b>BlueAnt Supertooth3</b> \$159 Retail	2.0	33 days	15 hrs.	-Clear voice capture Digital Sound Processing	<b>2 years</b>	-Comes with mini USB wall & car charger -Pairs up to 8 devices -Voice answer -Downloads phonebook -Audible call ID -Automatic vibration sensor reconnection
<b>Blackberry VM-605</b> \$139 Retail	2.0	10 days w/ timeout shutdown	13 hrs.	-Echo and noise cancelation	<b>1 year</b>	-Audible call ID -Includes micro USB car charger -Built in FM transmitter (need A2DP phone), so you can take/make calls and listen to music through your car speakers.

**CrystalTalk/DSP/Digital Sound Processing:** Different names for technology that enhances the quality and clarity of a call by reducing background noise and increasing echo cancelation.

**Dual Microphone Reduction:** One microphone is dedicated to picking up all the background noise, while the other is dedicated to the voice of the person using the phone. Using a technology called DSE algorithms the headset will subtract the background noise from the person's voice creating a clearer call.

**EDR (Enhanced Data Rate):** Up to 2.1 megabits/second up from 721 kilobytes/second with Bluetooth v1.2 & reduces power consumption.

**Automatic Volume Adjust:** The Bluetooth volume will adjust automatically when you walk into a noisy environment.

**GOOG 411:** Say where and say what you are looking for, GOOG 411 will connect you with the business you choose and can even send you a text message with the location and phone number.

**DSP algorithms:** Powerful noise suppression technology developed for the military for use in extremely noisy environments. It utilizes dual microphone reduction and Jawbones VAS (voice activity sensor) which detects when a person is talking and captures the frequencies of their speech.
